

1965 Chevrolet Corsa Corvair Convertible.

Originally purchased, used, in'65 by my father in Hayward, CA. It's been a Bay Area car ever since. This was the car in which my mom drove me, my brother, and sister around town. Without doubt, it holds signifigant sentimental value for me. As we got older it was driven less and less, until my sister was allowed to take it over in high school. Over time, and as we acquired newer cars, the Corvair became a forgotten fixture in the garage, mostly because it was near impossible to find a reliable mechanic.

Cut to 2015. I was working in San Francisco at an advertising firm that had just won the Chevrolet account. We celebrated the win by inviting several car clubs to show off their Chevys in our parking lot while we downed beers. I started to ask around if anyone had ever worked on Corvairs...nobody had but this one guy from one of the car clubs looked up from his hot dog and said he would give it a shot. A week later he showed up with a flatbed truck at my parents' house and hauled it away. A few months passed and a big check later, we were back in business. He loved rebuilding that Corvair so much, he went on to buy his own.

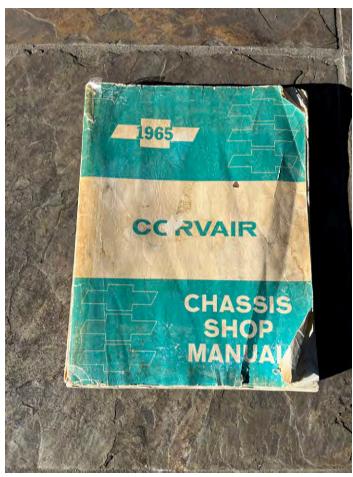

I was fired up to take over the newly rebuilt Corvair. I had three very young children at the time and quickly realized that it wasn't going to get much of my attention. I drove it to work sometimes, I'd pick my mom up for Sunday drives, but mostly, it has sat in my driveway under a tarp. I love that car, and I didn't think I would ever part with it. My favorite thing was to take it out in the summer months, with the top down, and cruise for hours through the quiet country roads behind my parents' house. During those isolated months of the Pandemic, that's what our family looked forward to on warm evenings. Top down, my wife in the front, three kids with no seat belts and the dog in the back, the wind blowing our hair out of control, the sunset warming our cold faces, and feeling grateful for our health and each other.

One day, I must have pushed it too much and started hearing some horrible sounds, I knew instantly the motor was in trouble. We were able to limp home, but it's been sitting ever since. As much as I would love to hold onto it forever, I'd rather it go to someone that will love it enough to get it rolling again. I've spent a lot of money getting it to this point, and would have done it differently in hindsight especially after finding the Corvair club. I have no idea how to price it, and am hoping you can help me find a loving forever home for it.

ps. It doesn't leak.
